File Format Requirements

Accepted File Formats

We accept the following file formats: **AI, EPS, PDF** (vector preferred), **PNG, PSD**.

Minimum resolution for raster images: **300 DPI** at print size.

Color mode: **CMYK** for best color accuracy, though we can convert from RGB.

Vector vs. Raster

Vector files (AI, EPS, PDF) provide the best results as they can be scaled to any size without losing quality. Raster files (PNG, PSD) must be at least 300 DPI at the final print size.

How to Submit Your Artwork

Submitting Your Artwork

Email your artwork files to **[email]**. Include your name, order number (if applicable), and any specific instructions.

For large files, use **[file sharing method]**.

What to Include

- Your name and contact information
- Order number (if you have one)
- Desired print location(s) on the garment
- Color specifications or Pantone numbers
- Any special instructions

Artwork Tips & Common Issues

Artwork Tips & Common Issues

Common issues that delay production and how to avoid them:

- **Low resolution images:** Ensure your artwork is at least 300 DPI at print size. Web images (72 DPI) will not print well.
- **Missing fonts:** Convert all text to outlines/paths before submitting to avoid font substitution issues.
- **Wrong color mode:** Submit in CMYK for best color accuracy. RGB files may shift in color during conversion.
- **Too many colors:** Screen printing works best with spot colors. If your design has gradients or photographic elements, ask us about DTF or DTG options.
- **Insufficient bleed:** If your design extends to the edge of the print area, include at least 0.25" bleed.
