

DTG / DTF

DTG / DTF Printing

Direct-to-garment (DTG) and direct-to-film (DTF) printing allows full-color photographic prints with no minimum quantity.

Best For

- Full-color, photographic designs
- Small quantities (even single pieces)
- Designs with many colors or gradients
- On-demand and sample production

DTG vs. DTF

- **DTG:** Prints directly onto the garment. Works best on 100%% cotton, light-colored fabrics.
- **DTF:** Prints onto a transfer film, then applied with heat press. Works on virtually any fabric type or color.
