

# Heat Transfer / HTV

## Heat Transfer / HTV

Heat transfer vinyl is great for small quantities, names, numbers, and multi-color designs. Vinyl is cut and heat-pressed onto the garment.

### Best For

- Small quantities (1-24 pieces)
- Individual names and numbers
- Multi-color designs without screen setup costs
- Metallic, glitter, and specialty finishes

### Considerations

- Not as cost-effective at very high quantities
- Best for simple shapes and text
- Requires proper care (inside-out washing recommended)
